

THE GLEICHEN CALL

VOLUME XXXII

NO. 28

GLEICHEN, ALBERTA, WEDNESDAY

SEPTEMBER 27, 1939

SUBSCRIPTION \$2.00 PER YEAR

HARVESTING WILL NOT BE FINISHED FOR SOME TIME

In the neighborhood of 240,000 bushels of this year's wheat has been received at the three elevators here. For sometime past when it has been pouring into the elevators in steady streams the result for a time it looked as if the elevators might become clogged but the arrival of freight cars which were immediately loaded helped to relieve the situation and the elevators have been busy ever since. Saturday will see up to threshing and combining, causing a slackening in the delivery of grain to the elevators. If fine weather prevails and a shortage of freight cars would develop it is likely the elevators will soon become full.

Last Saturday night a heavy shower of rain fell over the district effectively stopping harvesting for a day or two. A drive through the country shows that a large number of fields of grain are yet standing waiting for the combine. Along side the fields of standing grain are fields of stooked grain waiting for the threshers. It looks as if it will be sometime yet before harvesting is completed.

Grain is said to be pouring into the elevators but it can be shipped out. J. A. Menard, secretary of Railway Association of Canada, reported the heavy movement he created serious transportation problems. In 20 days, deliveries of grain were over 147,749,000 bushels, more than double the figure for 1928 or 1929.

THE WAR AND WHEAT

The current world situation as regards to wheat is a complex and puzzling one. Unquestionably there is a super-abundance of wheat throughout the world. The question is, what the price could be very low. But war has interrupted the natural course of trade and created an abnormal situation.

World trade last year totalled 60 million bushels. The largest import estimate of trade for 1939-40, made prior to the start of the war, was 58 million bushels. The largest import nation in the world is, of course, the United Kingdom which has taken around 200 million bushels. With the world carryover from last year of 1,200 million bushels and with the fact that very well confirmed, the 1939 world crop is likely to be the largest in history of the world) the available supply to fill import nation's needs is tremendous.

Most European nations have been hit by their losses and the continuation of war in Germany has brought wheat to last her until next harvest. France could export 50 million bushels without touching huge reserves and even so the market would not enough wheat to last for six months. There is certainly no shortage of wheat in most European nations to day. The one notable exception is Spain. It is possible that Spain will need to import wheat.

What particularly concerns Europe right now is that the war may be a long one and the nations there must look ahead to see what their supplies, those who are to go hungry. The United Kingdom's particular problem is to see that supplies are obtainable at the closest possible location. Shipping from distant lands is expensive and dangerous and will become more so if German submarines are very active—Wheat Pool Budget.

LOCAL NEWS ITEMS CRAIGANTLER AND DISTRICT

Miss Wair intends to put on a dance at the school around Hallowe'en time. The date will be set later on.

The potato crop is the poorest in thirty years around this district.

We are sorry to learn that L. L. Lovett is getting along in the step. But Lars 70 years is the allotted span and you have had a good time.

Our school teacher, Miss Wair, was a Calgary visitor over the week end.

Mr. and Mrs. Bailey of Calgary

Meeting Friday Evening Will Organize Red Cross Society

Mayor J. A. Menard is calling a public meeting for the purpose of organizing a branch of the Red Cross Society here for war purposes, in the Community Hall next Friday evening, September 29th at 8 o'clock. It is hoped that every person in town will turn out and help get the movement under way and stay with it until the end of the war. When organized it will function similarly to the organization during the war of 1914 to 1918, which did most efficient work in many ways. According to information from headquarters the meeting should appoint president, vice-president, secretary a full executive named and committee for soldier service, enrollment and finance.

During the last war thousands of dollars was raised locally by the Red Cross members of the town and district. Valuable service was rendered by the ladies of the committees by rolling bandages, etc., and supplying the boys overseas with many comforts.

The soldiers service committee will secure the names and home addresses, as well as the service addresses of all Canadians in this district who are serving in any branch of the British army. They will also determine the type of service and the rank of any men now enlisted, or to join later.

The enrollment committee will supervise the issue and collection of forms for the enrollment of voluntary workers who wish to serve with the Red Cross. The finance committee will be responsible for organization of campaign funds to assist in furnishing supplies needed by the soldiers.

There Sunday visitors at the home of Capt. and Mrs. Grant. Eddie Biddle has been promoted in the Calgary Highlanders.

Capt. Grant has just received word from Scotland that three of his nephews are in the air force and another in the Gordon Highlanders. One is at present in Africa with the air force and with Eddie Biddle enlisted that is five.

Jack Cleal our last school teacher is at present teaching at Forest Lawn school near Calgary.

H. B. Grant, of the Grant Lodge, is in the hospital with a sore throat. So far it is much better than he expected but he will not say what it will average until finished.

Bill Smith and Rodger Connat are taking of joining the army. It will do both of them good and we wish them luck and a safe return.

Gordon and Mrs. Gimbel accompanied by Mr. and Mrs. Gimbel, Sr., of Hoytville were Sunday visitors at the home of Capt. and Mrs. Grant.

MAP OF THE NATURAL RESOURCES OF ALBERTA

Since the transfer of the Alberta natural resources from dominion to provincial control on October 1st, 1938, there has been a growing demand for the publication of a map of this province which would enumerate the various resources and give their locations. Such a map has now been prepared and is ready for distribution. In compiling with the government mineral maps have been used to take in the more important areas. It was of importance that the information contained in a map of this nature should be of value to classes of people, from school students without any previous training for educational purposes, miners, trappers, hunters and fishermen and to technical institutions for purposes of reference.

The map, therefore has been designed with a view to filling these many wants. It is 39 1/4 inches by 22 inches in size, and is on a scale of 20 miles to the inch. Distinctive features are shown, red, green and blue water power, etc., are given.

In addition to this map, a half yearly review in pamphlet form, covering the oil situation in Alberta up to June 30, 1939, has also been published by the department. This is ready for distribution, and will be sent to publications, or both, may be secured by application to the Technical Division of the Department of Lands and Mines, Edmonton.

THE RUM ISSUE

BY FRED JONES
This Column Given to News of the Gleichen Branch of the Canadian Legion.

Stand to! It is time that Armistice Day is to be observed in the usual manner. Some thought the war would prevent it but nothing need interfere with honoring our departed comrades "over there." They are here to stay, the Canadian Legion and here the torch and finish the job they started. That they did not complete the task last time was not their fault—they gave all they had. The boys will be here to take up the task but will try and hold the line on Germany this time that they may have peace where they sleep. "In Flanders' Fields."

Sister Suise sitting on the sewing machine as mentioned in The Albertan a short time ago. Sister Suise's efforts are highly commendable but we would suggest that these efforts be directed to foreign aid to those at the front in our country and in this country and from their positions are able to get the needed goods. There is such a thing as working the willing horse to death and others should be asked to make a stand to get the needed horses, making clothes which can be purchased by the men themselves. If the Suise wants to make things for men, well and good, but others are more qualified to do this or can easily afford to procure all the clothes he needs. The lowest pay is a dollar thirty and everything found but personal necessities such as soap, tooth paste, polish, etc. etc. is what is needed. A sweater or mitts he can buy but it himself. There is no shortage of this class of goods in the stores. We do not mean to be critical of the Suise but for the necessities she will be quite willing to get their own supplies where they can be had. All veterans will admit that Fritzie is just about the strongest woman we could ever see before. She through her efforts may be of great help from all the Sister Suise we can find. So, carry on with sewing Sisters, only see that the shirts and sox go to soldiers who cannot get them any other way.

Buster the seal, Houdini of the Calgary zio is doing C.R.B. again but we promise not to write any more rhymes or he might break out again. We suggest that Keeler from Fort Macleod and assistants get some farms which has had experience keeping three or four old sons under lock and key, have a look at Buster's canal before it is passed as seal time.

The winter is coming on to Black Diamond sometime ago and called on Com. I. Gove and his wife, who had just returned from a trip to the Coast. "Scooty" was busy on his new business and when we called on him quickly got orders—learning as a married man what he had already been told in the army. You can think what you like but don't think out loud."

At the same time, Lewis in Detroit, on the other side of the continent was complaining about the temperature he said "It's very cold here only fifty nine." It may feel colder there at fifty nine but it is not cold here—perhaps we are not used to it.

Discussion took place regarding the quilt exhibit which is to be held on November 9th. Mrs. McKeever and Mrs. Calkins are to act on the committee and outside judges will be engaged for the occasion. Paper to be used for the quilt will be given to the October 5th meeting which is to be held at Mrs. McKeever's.

After the usual social hour a delicious lunch was served by the hostess. The organization will meet again on October 12th at the home of Mrs. A. McLean.

Almost every one reports a poor potato crop this year. The potato crop for June is blamed for the spud failure. A lot report they expect to have enough potatoes for themselves but none for sale.

water power, etc., are given.

In addition to this map, a half yearly review in pamphlet form, covering the oil situation in Alberta up to June 30, 1939, has also been published by the department. This is ready for distribution, and will be sent to publications, or both, may be secured by application to the Technical Division of the Department of Lands and Mines, Edmonton.

LIGHTS OUT.

MASSEY-HARRIS DEALER

I wish to thank personally my many customers for their co-operation in making the Massey-Harris Power-Take-Off Combine and Power Binder the outstanding success it is. In introducing these new machines it takes a great deal of patience and service. I have done my utmost to give you service and you have certainly been patient. For this I wish to thank you.

For your fall work and spring seeding, please, remember the Massey-Harris

ONE-WAY-DISC AND SEEDER
the best implement engineers could design for light draft, even penetration, accurate seed placement, self-cleaning dish of discs, long wear and low repair costs.

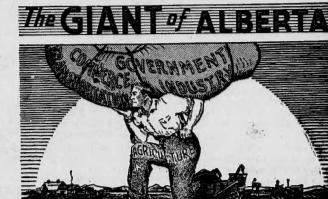

Again I thank you for your patronage and patience.

Sincerely yours
W. SUTERMEISTER.

THE ancients thought the sky was held up on the shoulders of the giant Atlas. But Alberta is actually carried, from an economic standpoint, on the shoulders of the giant Agriculture.

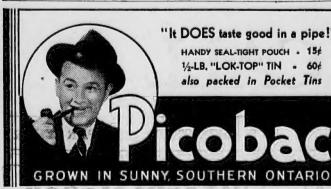

Last year, less than 100,000 Alberta farmers produced \$167 million of new wealth. Of that total \$118 million came from field crops, mostly wheat.

Where would Alberta's 775,000 people get a living if it were not for agriculture? Yet the great industry must struggle along under the burden of marketing methods which, more often than not, provide inadequate prices. Sophistry and theorizing avail little. Action is needed. The Wheat Pool and the farm organizations got the Wheat Board. This was a great forward step in marketing wheat, to which all now subscribe.

But it is just a step. The Board must be perpetuated. The agricultural industry must have greater all-round price protection. There must be no return to the laissez-faire methods. An aroused agriculture can make progress by uniting its strength. The best way to do this is to build up farm organizations and co-operatives.

Everybody's War

For the first time in history Canada has declared war against another country—not a war against the German people who, in the main are probably as peace loving a people as the Canadians, but against the authority in charge of the government of Germany; in short, against the dictator, Herr Hitler.

When Canada went into the great war of 1914-18 she had not assumed the full status of nationhood and although this country, at that time, followed the lead of the Motherland willingly and even with enthusiasm, she did not then assume the status of war in her day-to-day existence.

The time Canada gave up her liberty is a moment with all the force and power of a sovereign nation in her own right. She enters the conflict as a co-partner with and of the same status as Great Britain. She voiced her decision to do so of her own volition and expressed her decision in the democratic way, through her parliament, the symbol of her democratic form of government which the people of this country have decided to uphold against aggression.

What is more, the decision of Canada to participate actively in this war, as voiced through the parliament, was unanimous. All political parties represented in both houses joined forces in uttering the decree which formally ended up that war with Britain, France and Russia against the dictator with whom millions of his own people as well as millions of the subjects of the democracies to enable him to satisfy his lust for power and conquest.

Inside the walls of Canada is concerned, she has decided unanimously to play the role of a bulwark in a war to save Hitler from controlling the world's people, instrumental in the destruction of the people of the country said, along with the people of France, Great Britain, Australia, and other units of the British Empire that it is high time to call a halt to the kind of thing which has constituted a continual menace to the peace of the world for the last two or three years.

The people of Canada, along with the people of the other democracies now in the fight, are peace loving. They are anxious to be allowed to go about their own business, to be able to make progress in the fields of agriculture and industry without hindrance, enjoy their social life and the happiness and contentment which are rightfully theirs. But the people of this country are determined to stand up and serve to the best of their ability to see that the liberty and freedom won by them by their forbears. It must be a peace with honor—a peace which carries the right of self-government for Canada and all those nations whose people believe in that high privilege.

War's Responsibilities

Canada, having decided of her own free will and with all the authority of nationhood in her own right to engage in this conflict, the people of this country have, for the first time in their history, assumed all the responsibilities which devolve upon people who declare war upon others.

As a result of her own decision, as voiced through the nation's representatives, she has decided that for the time being, any taxes that will wage this fight on a voluntary basis, and this entails the individual in the country the responsibility of doing his or her utmost to do his or her share to the best of his or her ability and in the manner in which he or she may be best fitted.

She has agreed to entail sacrifices, but the people of this country have announced that they are willing to make the necessary sacrifices, no matter what they may be or how onerous they may be.

In this country, it is everybody's war. The duty of prosecuting the war with the utmost vigor is not confined to those who volunteer their services in the armed forces, the air force, or the militia in Edmonton. If it should decide to send an expeditionary force overseas, it will be in the second line of defense on this side of the Atlantic. Nor is it confined to the members of the veterans' and nursing organizations who recently responded no nobly to the call for registration of volunteers for emergency services in this country, if and when required.

No one can say that this is less than that. It embraces every man and woman and even the youth of the country. Agriculture, industry and the business of the country generally must be carried on with the maximum of energy and efficiency with the winning of the war as speedily as possible as the single objective.

The job of maintaining a single purpose guiding the activities of all people, whether they be engaged in the field, the factory or the counting house; whether they be working in government employ or teaching in the class room; whether they be business executives or drawing pay as artisans or common laborers.

No one can say that this struggle is going to be easy. No one knows yet what the forces of finance, military and man power may have to be drawn upon. No one knows what forces ultimately may be arrayed against the people of this country before victory can be claimed.

If for no other reason, these unknown factors dictate the necessity for preparedness and for the whole hearted and active support of all the forces this country can command in making these preparations and in waging this war. The war is a war for every Canadian.

Kitchener Of Khartoum

Romance With Pretty Irish Girl Spoiled His Life

In an old grey farmhouse in County Kildare, miles from the nearest town, the woman wanted Kitchener of Khartoum to marry, writes E. Travers-Hutchin in the London Sunday Dispatch.

At that time his later life he was reported to be working as a waiter, never married. He was held to be a point of rudeness with women he had to meet. The love for Miss Katie Kelly, farmer's daughter, who he met when stationed at the Curragh in the late seventies, was never forgotten.

Now their story can be revealed—

Paintings On Sugar Canes Decorated Royal Wedding Cake

Had the Duke and Duchess of Kent gone to Australia in October of 1911, as was originally planned, it was expected that exquisite little paintings on sugar canes would accompany them. These formed the decoration of their wedding cake, which was the London Sketch.

With a rather weary officer relaxed, became gay as they rode together down the green lanes that led from his home at Hill of Rathbride, near the great military plain where the Duke was born.

There was a shadow in their lives. Miss Kelly's mother disapproved of young Kitchener paying court to her daughter. Indeed, she did not approve of all the friendless visitors who came to the Kitchener residence—and devout ones, and Kitchener was a Protestant. It was on that rock that the romance was founded.

Now a little old lady of nearly 80, Mrs. Kelly lives alone, her only companion a single maid-servant, in the ivy-covered farmhouse where the great soldier came to visit her.

Eiderdown Industry

Eskimos To Collect Down For The First Time

Permit to establish an eiderdown industry in the Eastern Arctic has been granted by the Department of Mines and Resources, Ottawa. An area embracing the southern coastline of Baffin Island and all islands east from Cape Dorset to Pangnirtung has been leased to the company for the collection of eider down. A permit for the collection of the down has been issued under the authority of the Migratory Birds Convention Act.

About 1,500 Eskimos live in the eider duck area, and the development of the industry should contribute to the livelihood of many of them at a time when their usual work to do during the period between the nesting and hunting seasons. Under the company's plan Eskimos families participating in the industry will be allotted a certain region in which to collect eiderdown. The natives will be taught how to remove the down without causing the ducks to abandon their nests, as well as the proper methods of skinning.

In addition to contributing to the support of the Eskimos, the new industry is expected to encourage conservation of the ducks by the natives. However, the number of eiders has no idea of the value of eiderdown and did not use it for any commercial purpose. Periodic visits to the nesting grounds by the native collectors will tend to safeguard the birds from foxes and other natural enemies.

For the development of the eiderdown industry the new industry is expected to make available its use for the Baffin, Jasper and Waterton Lakes National Parks on the east slope of the Rocky Mountains, a fully equipped forest-fire hazard research station has been established at the eastern part of the new Experimental Station at Beech, Alberta. The forest and climatic conditions in this area differ markedly from those in the eastern parks, but it has been deemed necessary to institute special studies to properly interpret the relationship between weather and fire hazard.

To Protect Forests

Forest Fire Research In Western Canada Is Being Carried On

In progress in forest-fire research in Western Canada is reported by the Dominion Forest Service, Department of Mines and Resources, Ottawa. For the past summer the system of forest-fire hazard measurement developed at the Petawawa Forest Experiment Station in Ontario has been introduced in Riding Mountain National Park in Manitoba, and in Prince Albert National Park in Saskatchewan. Four forest-fire weather stations have been established in each park, and similar stations are being carried on at Riding Mountain to adapt the system to the conditions in those two parks.

By means of special weather stations and daily weather reports the system makes it possible to keep track of the variations in fire hazard from day to day and to adopt precautionary measures that will prevent the spread of fires, especially rising to dangerous levels. This method has now been in use for some years throughout the provinces of Quebec and New Brunswick where special stations have been made to adapt the system to the particular forest and climate conditions prevailing in those regions.

For the purpose of developing a system of forest-fire hazard measurement the Baffin, Jasper and Waterton Lakes National Parks on the east slope of the Rocky Mountains, a fully equipped forest-fire hazard research station has been established at the eastern part of the new Experimental Station at Beech, Alberta. The forest and climatic conditions in this area differ markedly from those in the eastern parks, but it has been deemed necessary to institute special studies to properly interpret the relationship between weather and fire hazard.

World's Next Gold Rush

Will In Tibet According To Opinion Of Explorer

Out-of-Tibet where the lowest altitude in the highest peaks of Canada was first begun in 1853 along the north shore of the Gulf of St. Lawrence. It was started as a means of profit for the ducks by bringing on the inhabitants the benefits to be gained by safeguarding the birds and adopting modern methods in the collection of down.

The eider duck is a native of the Arctic and breeds it in their nests as a soft, warm protection for their eggs. By the exercise of due care, some of the down can be taken from the duck without causing the duck to abandon incubation or without interfering with the eventual hatching of the eggs.

Will To Serve

Vancouver Astrid Helped Train South African Air Force Reserves

Helen Harrison, who has an unusual head of light brown curls and 1,200 flying hours to her credit, is willing to train other women to serve in the war.

The Vancouver-born girl who has stunting displays her yellow "Moth" plane at the Canadian National Exhibition, Toronto, is a licensed instructor and helped train 1,500 men for the South African air force.

Six years ago she went up for a joy-ride and promptly decided to make a career of it. That was in England, where she was educated.

She said she may possibly be used to help train men for the Royal Canadian Air Force but nothing definite yet. Miss Harrison said she would serve as a pilot for war duties if she was called upon.

The killing of a falcon was a crime punishable by death in the reign of King Edward III of England.

Lima beans were brought to the United States in 1824, from Lima, Peru, for which they are named.

For many years the development of an airplane motor powerful enough to fly heavy freight will be the ultimate solution for transporting the precious metal. He recently visited Tibet and the interior of China.

Sounds Like A Record

It looks like "bigger and better" eggs would be the slogan of hens as their contribution to increased world food production.

Mr. W. W. Temple, Calgary, bought a dozen eggs from a produce peddler. Eight of the eggs had double yolks and all were grade A.

Starfish see with their arms, but they probably can distinguish only light and shadow by the light-sensitive cells that form the "eye-spots."

In蒲林on London schools have decreased from \$2,000 to \$20,000 in the last ten years.

The Prince of Alexandra, world famous lighthouse, guided ships by its wood fire beacon for 1,500 years.

There are approximately 4,000,000 tennis players in the United States.

A Dog Story

Famous New Zealand Dog Who Was Protected By Act of Parliament

There died in Wellington, N.Z., recently the old age dog, a giant dog, "Toro" the Wanderer. He was as famous in his own way throughout the Dominion as the dolphin, Pelorus Jack, who for years met and accompanied New Zealand coastal steamers from the Pacific Pass to the longages to and from Nelson in the South Island, and who was protected by special Act of Parliament to provide for his needs.

For a long time a big Airedale-terrier cross, was given the name of Wanderer by his friends on the water front of Wellington—seamen, wharf laborers and taximen—because of his habit of staying where he was kept his fancy of traversing by sea or land.

So far as is known, he was the only dog ever to choose to live instinctively with the New Zealanders, the Australian sailors. Similarly, for his overland trips it is said that he always preferred the cars of his friends the taxi drivers.

He went west and he went all over the North Island and visited the ports of the South, and twice even voyaged as far as Sydney—he was always welcome—a grave, sedate, dignified, unobtrusive dog with strength but unending energy and a friend to all his friends. He was the first dog to fly in New Zealand, and he was speeded aboard the airplane a passenger with his fate fully paid by his friends the taximen.

In the ten or eleven years of his travels, wherever they were, he always returned to Wellington. It was not that he had come to like the city, but to his own home. It was Paddy's peculiar title to fame that he lived independently as the guest of the community of transport workers on sea and land, with Wellington as his headquarters and home port.

Many legends grew up about him, but his origin was unknown until accounts of his death were made public. He had been the mascot of a company of sailors who had been lost at sea.

The girl died two years later. Paddy was an unusual and roamed about the wharves. The dog could not set the wharves, but he was a friend to the wandering dog. He had chosen—Manchester Guardian.

Has Become Habitable

United States' Death Valley Now Used As Winter Resort

The Rev. John H. Crowley, a Catholic priest visiting the World's Fair, brings up again the death of Death Valley, once regarded as the most dangerous place in the United States. It is rapidly becoming a successful winter resort, states the New York Times. He says that last season more than 60,000 persons either stopped over in the valley during the winter.

Less than a century ago Death Valley, haunt of the rattler and the cactus, was impassable. It is claimed that the first party of Fortyniners who perished in an attempt to cross its barren sands. It takes about 276 feet below sea level and most of the year gets snow.

The valley has its own features, the Funeral Mountains, and Furnace Creek, are forbidding. But for many years now it has been exploited for its deposits of borax.

The country has railroads, no roads, no trails, not a wheelbarrow, no animals, no houses and deposit it in their nests as a soft, warm protection for their eggs. By the exercise of due care, some of the down can be taken from the duck without causing the duck to abandon incubation or without interfering with the eventual hatching of the eggs.

There is a great deal of gold in Tibet, a young explorer said. Then he added:

"I have seen tons of it on the roofs of Tibetan monasteries and temples is scattered on the ground and in streams. However, it's not a wise place to go because it's impossible at present to get to the outside world."

CANADIAN

Canadian exports to United States rose from \$39,601,895 to \$61,704,142 during August, according to the latest figures of the Dominion Bureau of Statistics. Exports for the first six months of 1939 totalled \$305,464,545, an increase of more than \$125 million over the same period of 1938.

Nearly 600 special guards keep watch against sabotage in Ontario's great hydro-electric plants, a task to the province of \$750 per day. The new Ontario legislature, convened last week, has passed a bill charging this "private army" was unconstitutional and joined the frontiers in placing responsibility with the minister of defense department. The special service is to be used to combat those intent on legislation.

Some means would be found "whereby Canadian dollars may be made available to the British government to meet its financial obligations in this country," said Hon. Ian Macdonald. In a recent statement, Reptarization of Canadian securities and granting of credits were mentioned as "probable" methods. Bureau of Statistics estimates British isles imports in 1939 will be about \$72,700,000,000, about half of which is in bonds and debentures.

Resolution suggesting that the government of Canada in Canada be allowed to establish a national control was adopted recently by All-Canadian Congress of Labor. The resolution (aid it was not in the best interest of the country to leave the industry "in the hands of unpartisan self-seekers."

TRUCK DRIVERS HAVE POOR OPINION OF PRIVATE DRIVER

The truck driver, Mr. and Mrs. Private Driver, doesn't think much of your ability to pilot an automobile safely!

Want you to call this same truck driver, a road-hog or not, and sevemned that there ought to be a law to keep trucks off the road.

But times have changed. And the drivers of safety. Local drivers have announced that the quality of the commercial vehicle drivers has greatly improved his safety record in recent years, while that of the private car driver has become worse.

NOTICE

Inpounded in the pound kept by J. T. Pedersen, located on the N. E. 28-23-21-4th, on the 6th day of September, 1939 and sold on the 20th day of September, 1939.

White mare, aged 13, branded "A" left thigh and T left shoulder, to A. Bakerhouse, of Albert Park, Calgary.

For information apply to W. E. Thompson, Secretary-Treasurer, of the Municipal District of Blackfoot No. 12, Gleichen, Alberta.

Since 1927 the number of trucks involved in fatal accidents has decreased 29 per cent. The number of buses involved in fatal accidents has dropped 41 per cent during that period. The number of passenger cars involved in fatal accidents since 1927 has increased 21 per cent.

It may be wondered, then, that the truck and bus driver feel they are entitled to back a few opinions of their own. Here are some of them.

There are a number of reasons why the average commercial vehicle driver is a safe driver," says James G. Dryden, president of the British Columbia Safety Council.

Most among the reasons listed by Mr. Dryden are:

1. The commercial driver makes his living behind the wheel. He's at it an average of eight hours a day. It's the very volume of his experience pounds home the need for safe

A Responsibility For Value

THIS line which has made a fast crossing of the Atlantic, ever afterwards living up to its own record. Each successive voyage is compared, and indeed the record is beaten into the ruck of the six or seven-day vessels, there would be nothing to compare with it in disappointment. So it is a high achievement in this sphere.

A boxer who has held the world's heavyweight title and goes down to the punch from round to round, the laughing stock of sports writers and fans. The baseball team in Canada stands at the top of the league and goes up in the world. The name of a little known team becomes a target for wits. People are short of time, short of money, short of energy, once a high standard has been established.

Business has a personality that is deep-seated. The personality of a business can't be changed by changing the newspaper or the size of its price tickets. A commission man can't change a business's name to make it attractive. Name is only superficialities.

Over the years EATON'S has built up an enviable reputation for value, size and this responsibility sits heavily on our shoulders. The person who buys from this Company is to give Service and Value—noticing short of which is unacceptable.
